

DO YOU WANT TO MAKE A DIFFERENCE?

Do your professional goals focus on **doing something significant**, making a contribution by **doing the right thing**, **something that may even seem impossible?**...

Do you want to be part of a dynamic, sincere and vibrant company, where people matter, each project is unique, and the goal is to ensure outstanding results for our clients?

Are you ready to give your best to what may become the most exciting professional challenge in your career?

Come to

We are a no-nonsense CRO, that delivers by taking the right actions even when that is the harder path.

In today's busy and often faceless corporate environment **we dare to be different**. We respect our people and our clients, we take responsibility, we acknowledge and learn from mistakes, we work very hard, and have fun doing that!

We care for what we do, and how we do this, constantly raising the bar not just for ourselves but for our customers, our investigators and our partners.

We are currently looking for:

A knowledgeable, entrepreneurial and proactive SAS Programmer to join our **Biostatistics team in St. Petersburg, Russia**

SAS Programmer

Following the company's stable and successful development, we are expanding our global Biostatistics department and opening a SAS Programmer vacancy to strengthen our **highly professional and vibrant team**.

If you are keen to contribute to statistical programming activities related to global clinical trials, work closely with teams of statisticians, programmers and data managers, program data sets for statistical analysis as well as data summaries, and be involved in something new, outstanding and challenging, **this job opportunity is perfect for you!**

PSI is recognized by a unique combination of team collaboration and independent work, global dimensions and individual approach, **stable and secure workplace** as well as innovative ways of doing things.

We provide high-quality employment, competitive salary, intensive training and a rewarding environment. It is a great chance to join the **company that really cares for its people**, and invests in their professional development and success.

If you value high quality standards, transparent communication lines, excellent opportunities for professional development, well-established infrastructure and energetic environment, **join PSI and start your career with us!**
