

«Statmod» Theme for Beamer

Коробейников Антон Иванович, гр. 522

Санкт-Петербургский государственный университет
Математико-механический факультет
Кафедра статистического моделирования

Научный руководитель: к.ф.-м.н., д. Барт А.Г.
Рецензент: к.ф.-м.н., д. Алексеева Н.П.

Санкт-Петербург
2007г.

Why

Why use \LaTeX , when there are specialized presentations tools
(OpenOffice.org Impress, Keynote, PowerPoint) available?

- Look: The layout of mathematical formulas and program text is much nicer... not to speak from ligatures in «ordinary» text
- Reuse of material: Going from a paper to a presentation is easy — just use the same «codebase»
- Portable solution: You can use whichever operating system you like
- Durable solution: usually even very old \LaTeX code can be typeset with modern installations

Mathematics

Example

$$\text{Hamming}(X, Y) = \sum_{i=1}^l f(x_i, y_i) \quad (1)$$

with $f(x, y)$ defined as follows:

Definition

$$f(x, y) = \begin{cases} 0 & \text{iff } |x - y| \leq \epsilon_h, \\ 1 & \text{else.} \end{cases} \quad (2)$$

Piecewise Text Modification

Shown on first slide. Shown on second slide. Shown on first slide.

- Shown on the second and the third slide.

Shown on all slides.

You get fine-grain control over which elements are visible at each time.

Piecewise Text Modification

Shown on first slide. Shown on second slide. Shown on first slide.

- Shown on the second and the third slide.

Shown on all slides.

You get fine-grain control over which elements are visible at each time.

Piecewise Text Modification

Shown on first slide. Shown on second slide. Shown on first slide.

- Shown on the second and the third slide.
- Shown from slide 3 on.

Shown from slide 3 on. Shown on all slides.

You get fine-grain control over which elements are visible at each time.

Piecewise Text Modification

Shown on first slide. Shown on second slide. Shown on first slide.

- Shown on the second and the third slide.
- Shown from slide 3 on.

Shown from slide 3 on. Shown on all slides.

You get fine-grain control over which elements are visible at each time.

Alert

Alert boxes direct the attention of the audience.

Lorem Ipsum

«Lorem ipsum dolor sit amet, consectetuer.»

Non eram nescius, Brute, cum, quae summis ingenii exquisitaque doctrina philosophi Graeco sermone tractavissent, ea Latinis litteris mandaremus, fore ut hic noster labor in varias reprehensiones incurreret.

Nam quibusdam, et iis quidem non admodum indoctis, totum hoc displicet philosophari.

Exampleblock

Examples are also highlighted in a different colour, making them less obtrusive.

Example

"Laoreet dolore magna ali quam erat volutprat."

You can also use a custom title:

Comodo consequat

"Ut wisi enim ad mi nim veniam, quis nostrud exerci."

Theorem

Theorems and definitions come in their own coloured boxes. A theorem:

Theorem

"Lorem ipsum dolor sit amet, consecetuer."

And a definition:

Definition

"Laoreet dolore magna ali quam erat volutprat."

Block

Blue boxes can also be used for other content you want to highlight.

Comodo consequat

«Laoreet dolore magna ali quam erat volutprat.»

You can also create boxes with no header.

«Ut wisi enim ad mi nim veniam, quis nostrud exerci.»

Beamercolorbox

Simple colored boxes are the least decorated way to draw attention to certain areas:

«Lorem ipsum dolor sit amet, consectetur.»

Quidam autem non tam id reprehendunt, si remissius agatur, sed tantum studium tamque multam operam ponendam in eo non arbitrantur.

Erunt etiam, et ii quidem eruditi Graecis litteris, contemnentes Latinas, qui se dicant in Graecis legendis operam malle consumere. Postremo aliquos futuros suspicor, qui me ad alias litteras vocent, genus hoc scribendi, etsi sit elegans, personae tamen et dignitatis esse negent.

Options

- **Background colour:** [blue|sand] set the background colour accordingly
- **Logo:** [mylogo|nologo] use one of the versions of the logo on the titlepage, your logo, or no logo at all
- **Page numbers:** [numbers] will include the number of the current slide in the footer
- **Section overview:** [compress|minmal] will only show the current section and subsection in the header or no section overview at all

Example

```
\usetheme[blue,compress,numbers,mylogo]{Statmod}
```

Conclusions

- Theme based on Warsaw theme that comes with Beamer and also on Trondheim theme
- The compress switch is useful if you are having (too) many (sub-) sections
- Options sand and blue for a slightly coloured background
- Feedback appreciated: asl@math.spbu.ru
